

GUIDELINES FOR FOOD AND BEVERAGES OFFERED TO STUDENTS AT SCHOOL FUNCTIONS

The Granton Area School District encourages the use of nutrient dense foods for all school functions and activities. Nutrient dense foods are those foods that provide students with calories rich in the nutrient content needed to be healthy. At any school function (parties, celebrations, feasts, sporting events, etc.) healthy food choice options should be available. Some suggested foods are listed below:

- Raw vegetable sticks/slices with low-fat dressing or yogurt dip
- Fresh fruit and 100% fruit juices
- Frozen fruit juice pops
- Dried fruits (raisins, banana chips, etc.)
- Trail mix (dried fruits and nuts)
- Dry roasted peanuts, tree nuts and soy nuts (not coconut or palm nuts)
- Low-fat meats and cheese sandwiches (use low-fat mayonnaise in chicken/tuna salads)
- Party mix (variety of cereals, nuts, pretzels, etc.)
- Low-sodium crackers & low fat cheese
- Baked corn chips & fat-free potato chips with salsa and low-fat dips (Ranch, French onion, bean, etc.)
- Low-fat muffins, granola bars and cookies
- Angel food and sponge cakes
- Flavored yogurt & fruit parfaits
- Jell-O and low-fat pudding cups
- Low-fat ice creams, frozen yogurts, sherbets
- Low-fat and skim milk products
- Pure ice cold water

Fundraising Activities and Concessions

Any fundraising requires administrative approval. To create a school environment that supports the promotion of healthy food and beverage choices for children, it is important to consider all venues where food and beverages are consumed or sold. The following recommendations are made to promote healthy choices for children related to fundraising activities supported by the school:

- Consider non-food items that raise funds such as books, gift-wrap, candles, plants, flowers, school promotional items, etc.
- Whenever food and beverages are sold that raise funds for the school consider healthy food choices.

Organizations operating concessions at school functions should consider healthy food choices in their offerings. It is recommended that groups market these healthy options at a lower profit margin to encourage selection by students.

Learning Incentives

The use of foods of minimal nutritional value as learning incentives should be kept to a minimum, and healthy food choices or non-food items should be substituted.

Foods of Minimal Nutritional Value as Defined by USDA:

- Soda Water - any carbonated beverage (even water). No product shall be excluded from this definition because it contains discrete nutrients added to the food such as vitamins, minerals and protein.
- Water Ices - any frozen, sweetened water such as "...sicles" and flavored ice with the exception of products that contain fruit or fruit juice.
- Chewing Gum - any flavored products from natural or synthetic gums and other ingredients that form an insoluble mass for chewing.
- Certain Candies - any processed foods made predominantly from sweeteners or artificial sweeteners with a variety of minor ingredients.
- Hard Candy - A product made predominantly from sugar (sucrose) and corn syrup that may be flavored and colored, is characterized by a hard, brittle texture and includes such items as sour balls, lollipops, fruit balls, candy sticks, starlight mints, after dinner mints, jaw breakers, sugar wafers, rock candy, cinnamon candies, breath mints and cough drops.
