

Granton Area High School

Course Guidebook

Last updated December 2024

Graduation Requirements Information

Students in grades 9-12 are required to be enrolled in a minimum of seven (7) credits for each academic year. Exceptions may be made for students who are attending high school beyond their eighth semester, participating in the Start College Now or Early College Credit programs, participating in the Youth Apprenticeship program for credit or participating in a school-to-work experience for credit. **Students participating in the Youth Apprenticeship program may receive up to 4 class periods of work release. Students participating in the school-to-work program may have up to 2 class periods of work release. School officials will make the final decision on the amount of work release given to a student participating in these programs.**

A total of **25 credits**, in addition to 1 credit of ACP, is **required for graduation**. Those credits must include the following:

Content	Graduation Credits required	Required Courses
English	4	<i>English I, English II</i>
Social Studies	3	<i>American History 1, American History II, Political Science</i>
Math	3	<i>Algebra I, Geometry</i>
Science	3	<i>Biology</i>
Health	.5	<i>Health (It is recommended to take health during freshman year.)</i>
Physical Education	1.5	<i>Any (Must take any one as a freshman)</i>
Personal Finance	.5	<i>Personal Finance</i>
Academic & Career Planning	1 (.25/year)	<i>ACP--during homeroom</i>
Electives	9.5	
Civics Exam	Must pass	<i>Must pass, administered as part of Political Science class</i>

4-Year Course Planning

Please note: This four-year plan is simply a guide to map out possible courses that will prepare and direct you toward a field of study after leaving high school. It will more than likely change over the course of the next few years, and that's ok! The scheduling process is complex and course availability can change from year to year. Contact your school counselor for any questions or concerns related to scheduling.

Schedule Change Policy

Students may request to add or drop courses without penalty only up to the three days following the start of a semester. Adding any course after the 3rd day of the quarter or semester will require consent of the instructor. This will not apply to transfer students.

If a course is dropped after the third day of the semester, the student will be awarded a grade of “WD”, or withdrawal. A “WD” has the same honor point value as an “F”, and will negatively impact the student’s class rank and grade point average and remain on the permanent academic transcript. The adding or dropping of a course three days after the start of a semester requires signatures from the student, parent, teachers and school counselor on an Add/Drop form, available in the Counseling Office. Requesting to add or drop does not guarantee the change will be made. School officials (school counselor, staff and administration) will examine the impact this decision may have on the student’s academic standing. **(In accordance with school board policy, no student will be allowed to drop a course that will lower the student’s credit attempts to below seven (7) credits for any one year.** When there are multiple sections of a course students may be assigned to a different section to balance class sizes and resolve staffing and scheduling problems.

Prerequisite Procedure

Some courses indicate a **Prerequisite** in their description. These are required conditions to be eligible to take the course, but may be bypassed if the instructor believes the class is in the best interest of the student and is at an appropriate academic level for the student.

If parents disagree with the instructor’s decision to enroll a student in a class, they may begin an appeal process. The course appeal team (teacher, student, parent/guardian, school counselor, and high school principal) will then discuss the decision. If a satisfactory agreement may not be reached, parents may contact the district superintendent.

Course Offerings

The course offerings at Granton High School are immense. The courses which our talented faculty teach are supplemented with course opportunities from Distance Learning and Virtual/On-Line high school to high school courses, UW College Courses via Early College Credit Program, Advanced Placement Courses, Technical College Courses via Start College Now Program, transcribed courses, and virtual education courses. All courses listed below are taught by Granton faculty. All other courses offered through the distance learning network indicate from which school the course is taught. Please see the descriptions below for an understanding of the wealth of opportunities available at Granton. If you do not see something listed that you are interested in, please contact your school counselor.

Distance Learning (DL):

Distance learning is an instructional delivery model and refers to the method in which courses not offered as face-to-face courses at Granton High School may be taught. Students in grades 9-12 may be eligible to take a distance-learning course on the Central Wisconsin Educational Telecommunications Network (CWETN) system or another cooperating network. All students requesting enrollment in a DL course will be evaluated by the high school principal, school counselor and/or district DL coordinator to determine if such a placement is academically appropriate.

The interactive web-cam allows a teacher to see and interact with students during their scheduled time. These courses may be high school to high school courses, early college credit courses, and/or start college now courses. Students must receive prior approval from the school counselor or building principal, and the course must comply with graduation requirements. Because coursework is completed remotely and their teacher is typically not on site at Granton, this format of education requires a high level of maturity and self-motivation. The cost for a DL course is paid for by the Granton Area School District. **In the event that a student does not successfully complete a college level or Wisconsin Virtual School course, the student/parent is responsible for the cost of the course.**

High School to High School:

These courses are high school level classes taught by high school teachers from other school districts. These classes are typically taught using our distance learning system, but may also be taught online.

Early College Credit:

This program allows Wisconsin public and private high school students to take one or more courses at an institution of higher education for high school and/or college credit. Under this section, “institution of higher education” means an institution within the University of Wisconsin System, a tribally controlled college, or a private, nonprofit institution of higher education located in the state. These courses are typically taught using our distance learning system or online. Tuition fees and books for courses taken as part of these programs for high school credit are paid for by GHS. If a student does not complete/pass the course, the student/parent is responsible for the cost of the course. Students interested should see the school counselor.

Deadlines: According to state law, March 1st is the deadline for all student applications during the first semester of the following school year. October 1st is the deadline for all applications submitted to GHS for students who want to be involved in either of the programs during the second semester of that school year.

Start College Now:

This program allows Wisconsin students to take one or more courses through the Wisconsin Technical College system. In accordance with Wisconsin state law, students who are interested in enrolling in a course that is not offered at GHS may be eligible to take the course at UW-Marshfield/Wood County, Mid-State Technical College or another academic institution. Though these courses are typically taught using our distance learning system, students must provide their own transportation if necessary. Tuition fees and books for courses taken as part of these programs for high school credit are paid for by GHS. If a student does not complete/pass the course, the student/parent is responsible for the cost of the course. Students interested should see the school counselor.

Deadlines: According to state law, March 1st is the deadline for all student applications during the first semester of the following school year. October 1st is the deadline for all applications submitted to GHS for students who want to be involved in either of the programs during the second semester of that school year.

Transcripted/Dual Credit:

Transcripted credit courses are an agreement between Granton High School and Mid-State Technical College (MSTC) or Northcentral Technical College (NTC) in which students receive both high school credit (by passing the course with a “C” or better) and technical college credit. Upon completion of a transcripted credit course, students receive an official MSTC/NTC transcript. Transcripted credit courses are actual technical college courses that are taught by Granton High School teachers here at Granton High School. There is no cost to the student for these technical college credits, which normally cost approximately \$100/credit.

Virtual/On-Line Education:

This is an instructional delivery model that does not require the student to be physically present in the same location as their teacher. All coursework is completed online, using the format provided by the course teacher. Format for assignment submission may include, but is not limited to Word, Google Docs, and Google Sheets. Students must receive prior approval from the school counselor and/or building principal, and the course must comply with graduation requirements. Approval by the guidance counselor or the building principal must be obtained prior to a student enrolling in an online or virtual course (taken from Granton Area School District Board Policy, Chapter 9, Section Q). Because coursework is completed online, this format of education requires a high level of maturity and self-motivation.

College Course Offerings:

A variety of college courses and technical college courses are available to juniors and seniors. Some of these are online learning, and some are virtual learning through the CWETN network. Please see your school counselor with any questions.

Please use this link to find all high school and college courses available. At the bottom of the page, there are tabs (sheets) that organize the course options by subject, as well as by high school and higher education facility.

Granton High School Course Offerings

Agriculture

<p><u>Offered Every Year</u></p> <p>Forestry Wildlife Management Landscape Management (fall) Advanced Landscape Management Vet Science (Science elective credit) Food Science (Science elective credit) Plant Science (Science elective credit, Spring only) Advanced Forestry (spring only) Agricultural Affairs</p> <p><u>Offered Even Number Years</u></p> <p>Large Animal Production Career Leadership Natural Resources GPS/GIS</p>	<p><u>Offered Odd Number Years</u></p> <p>Aquaculture Agribusiness Management Feeding America (fall) Small Animal Care Personal Leadership Ornamental Horticulture Fish, Forestry & Wildlife (TC, 10-12) General Horticulture (TC, 10-12, spring) Going Green in Agriculture (TC, 10-12) Large Animal Production 2</p>
--	---

Agribusiness Management: This course has been modified to focus on all areas associated with managing an agribusiness. We will discuss the types of businesses and the advantages and disadvantages of each. We will learn many bookkeeping skills for determining profitability, net worth, and inventory values. We will also look at the many aspects of marketing agricultural products and services. This course will help students gain personal management skills for the future.

½ Credit Prerequisite: none Grades: 9-12

Agricultural Affairs: This course will serve as an educational resource for students to develop a better understanding of the current issues impacting agriculture, not only in Wisconsin, but throughout the nation and world. Various controversial topics will be explored so that students are presented with the facts and are able to make responsible decisions based on those facts, not false pretenses. There will be lots of sharing of current event articles and stories, as well as data and facts that will generate discussion and debate. General topics will include the seven Agriculture Career Cluster Areas of Agribusiness, Animal Systems, Environmental Systems, Food Products, Natural Resources, Plant Systems, and Power and Structural Systems. Some units would include DNR Regulations, Sustainability, Ethics, Organic Farming, Genetically Modified Organisms (GMO's), Factory Farming, Technology, Food Safety, and much more.

½ Credit Prerequisite: none Grades: 9-12

Aquaculture: This course uses a hands-on approach to 21st agriculture utilizing our resource of water. Hydroponics is the growing of plants in water instead of soil. Members of this class will be instrumental in developing a hydroponics system for lettuce and tomato production in the agriculture department to supplement production in the greenhouse. The class members will also implement the increased use of the bulk fish tank, raising small game fish and tilapia fish. This will include all of the production aspects of fish through harvest, fileting, etc. In addition, home water units of aquariums through commercial production will be covered. We will also learn taxidermy procedures on panfish.

½ Credit Prerequisite: none Grades: 9-12

Career Leadership: This course will spend significant time on the various learning styles to highlight personal and professional development as students prepare for the world of work and/or higher education. This advanced course will help you better prepare for life beyond high school and to have a take-charge attitude about life. Time will be spent developing job applications, resumes and portfolios, as well as preparing for a job interview.

½ Credit Prerequisite: none Grades 9-12

Feeding America: This course takes an in-depth, hands-on approach to developing and marketing agriculture and dairy products. Labs will focus on the processing and preparation of foods from the time they leave the farm until they reach the consumer. Students will learn how to make dairy products, prepare jams and jellies, make candies, can and freeze fruits and vegetables, make meat jerky and more. Students will also study agriculture's role in today's food supply and the world scope of food production.

½ Credit Prerequisite: none Grades 9-12

Fish, Forestry & Wildlife (TC, Intro to Fisheries, Forestry & Wildlife Resources – 3 credits):

Integrated introduction to principles and practices of fisheries, forestry and wildlife management, including production of goods and services while maintaining ecosystem integrity and functions. Emphasis on contemporary issues.

½ Credit Prerequisite: none Grades: 10-12

Food Science (Science elective credit): This course combines agriculture and consumer education to develop an appreciation and understanding of the American Food Supply. Careers, nutritional requirements and food labeling will be featured. Steps and application in Food Processing and engineering will be demonstrated through various lab processes, as well as basic food microbiology labs. Food Safety, Biotechnology and new trends in food chemistry will also be a key emphasis of the course. This course proves to offer many hands-on exercises in studying food for its nutrient value and safe handling.

½ Credit Prerequisite: C or better in Biology Grades: 10-12

Forestry: The forestry industry is featured as the background to this course. We look at local, state and national forest management practices and plan to work on developing the current school forest. We will study the many forest products and management practices. This includes a study of the paper making industry, maple syrup production and lumber harvesting and marketing. This course is designed to help develop a better understanding of the life cycle and identification of many species of trees and to form a conservation attitude for working in and developing today's forests. This course is designed to utilize the current ecosystem and forest land on the school property.

½ Credit Prerequisite: none Grades: 9-12

Advanced Forestry: This course is an extension of the forestry course offered and students must have completed that course or received permission from the instructor for this course. This course will be a hands-on course designed to apply basic forest management skills and procedures utilizing the school forest as a learning lab.

½ Credit Prerequisite: Forestry Grades: 9-12

General Horticulture (TC, Mid-State Technical College: Intro to Horticulture 3 credits)

This course provides an overview of the science and profession of horticulture. Its role and importance throughout history, current trends, and careers will be covered. Particular attention is given to horticultural crops, their use and interrelationships among the environment, plant growth, and plant development.

½ Credit Prerequisite: none Grades: 10-12

Going Green in Agriculture (TC, Mid-State Technical College: Alternative Energy Overview Course - 2 credits)

In this course, students will investigate the need for renewable energy systems and emerging careers in renewable energy. Students will examine the basic design, function, cost, and other associated with various "green" energy systems, including solar photovoltaic, solar thermal, wind, geothermal and biomass. Students will also explore the production and use of alternative transportation fuels.

½ Credit Prerequisite: none Grades: 10-12

GPS/GIS in Agriculture: This course is for the technology minded. This course will utilize the newest technology in agriculture of the GPS (Global Positioning Systems) and GIS (Graphic Information Systems) Students will learn the many functions of a GPS and apply them in a lab environment. We will mark numerous agriculture plots and then develop maps and other pertinent information from the data collected. We will also look at GPS in the operation of agriculture equipment. We will learn the skill of geocaching, which is a hobby to collect hidden treasures throughout the nation, using GPS. Students will find the value and application of the GPS as a tool in many everyday activities, as well. It is predicted that at the end of the course, students will want their own GPS unit.

½ Credit Prerequisite: none Grades: 9-12

Landscape Management: We will learn the principles of designing a landscape for home and/or business, participate in the design and development practices, while then implementing these designs in a final installation project. This course is very hands-on and physical.

½ Credit Prerequisite: none Grades: 9-12

Advanced Landscape Management: This course is designed for students who completed the landscaping course and have an understanding of the basic landscaping principles. Students will participate in numerous outdoor projects that develop skills in landscape maintenance and installation, and during inclement weather, projects that utilize the new Landscape Pro software for designing various residential and commercial landscaping projects. This is a very hands-on class providing the opportunity for skill enhancement for potential home-owners of the future, as well as, those interested in green and outdoor careers.

½ Credit Prerequisite: Landscape Management Grades: 9-12

Large Animal Production: Provides fundamental knowledge of the animal science field. Topics include animal health, animal environments, anatomy and physiology, genetics and reproduction, animal feedstuffs, and job-related safety. Participants will experience animal concepts through the completion of hands-on activities.

½ Credit Prerequisite: none Grades: 9-12

Large Animal Production 2: Provides fundamental knowledge of the animal science field. Topics include animal health, animal environments, anatomy and physiology, genetics and reproduction, animal feedstuffs, and job-related safety. Participants will experience animal concepts through the completion of hands-on activities.

½ Credit Prerequisite: none Grades: 9-12

Natural Resources: This course identifies today's vital natural resources and highlights the important uses of conservation. The course includes a study of soil science as it relates to natural resources. Conservation practices are studied and an implementation plan and design is developed. Soil surveys are taught and performed throughout the Granton School District. Legal land description is also a big part of the program emphasizing business procedures in Natural Resources. Society's role in natural resource management is reviewed, as well as energy sources and pollution control. In addition, we look at our water supply and sources, and study the factors needed to ensure a safe and usable water supply for the future.

½ Credit Prerequisite: none Grades: 9-12

Ornamental Horticulture: runs at the same time as General Horticulture, but is not taken for MSTC credit

½ Credit Prerequisite: none Grades: 9-12

Personal Leadership: This course is designed to help students develop their personal leadership skills for the future. The various categories and styles of leadership will be addressed and individuals will learn how to use their strength and improve on their weaknesses in regard to numerous traits. Some emphasis will also be placed on communication skills as an individual and group. This course promises to be a fast paced, self-development class to help improve your self-confidence.

½ Credit Prerequisite: none Grades: 9-12

Plant Science (Science elective credit, Spring only): This course is designed to provide students with the concepts and knowledge of plant growth and production. Concepts from biology will be applied in this class as we investigate how plants conduct gas exchange, photosynthesis, and reproduction. A large portion of this class will be spent in the greenhouse and laboratory setting, so student participation is essential. Other concepts covered include plant anatomy, identification, soil management, nutrient assessments, and overseeing of the annual plant sale.

½ Credit Prerequisite: Grade of C or better in Biology Grades: 10-12

Small Animal Care: This course will feature hands-on labs raising and caring for the small animals and pets familiar to our area. General feeding and care requirements will be featured, along with health and other management skills. This course is for the animal and pet lover. Actual agriculture department pets will be purchased and cared for as a part of the class and will feature standard pets, as well as the unusual and unique.

½ Credit Prerequisite: none Grades: 9-12

Vet Science (Science elective credit): This course includes units on biotechnology, genetics, animal reproduction and physiology, veterinary science and animal health, and animal nutrition. Controversial and accepted technologies in agriculture are also studied. Students can train and receive certification in AI.

½ Credit Prerequisite: Grade of C or better in Biology Grades: 11-12

Wildlife Management: Wildlife habitat and ecological success is dependent upon a healthy environment. This course studies the wildlife species native to Wisconsin and their environmental and physical needs. The course also focuses on hunting and fishing regulations, taxidermy practices, outdoor photography and wildlife conservation and management. Students develop an appreciation of wildlife recreation and learn about the many conservation practices to help protect this valuable resource.

½ Credit Prerequisite: none Grades: 9-12

Art

Odd Number Years	Even Number Years
Graphic Design	Graphic Design
Drawing	Drawing
Ceramics	Ceramics
Photography	Photography
Independent Art Studio	Independent Art Studio
Printmaking	Painting
Advanced Drawing & Painting	Jewelry & Art Metals
Advanced Photography	Art History
Advanced Ceramics	Crafts
Sculpture	Industrial Design

Art History: Students will learn the broad history of art from prehistoric times to the art created today. This course will compare art to the time in which it was created and why artists created their art in this way. Students will be expected to take notes, memorize artists, names of pieces, artistic time periods and dates related to the pieces studied. There will be a class field trip to the Minneapolis Institute of Arts to view art in real life.

½ Credit Prerequisite: none Grades: 9-12

Ceramics: This class will emphasize developing personal expression and original ideas in ceramic media. Students will learn about functional and sculptural clay techniques using a variety of hand-building, wheel-thrown, slip-casting, and mold making. Glazes and different firing methods will be learned in addition to historical and technical styles of ceramics.

½ Credit Prerequisite: none Grades: 9-12

Advanced Ceramics: Advanced ceramic techniques in both wheel and/or hand-built sculpture. Students will take responsibility for kiln firing and visit professional pottery studios. There will be increased emphasis on creative and original expression of ideas.

½ Credit Prerequisite: successful completion of ceramics Grades: 9-12

Crafts: Students will explore the more crafty side of art. It's a DIY art class. Things from home decor, crocheting, needle felting to tie dying, candle making and sewing. These will be things they can decorate their homes with or give as gifts. Students get to explore their creativity and enjoy the process of creating.

½ Credit

Prerequisite: none

Grades: 9-12

Drawing: Drawing is the foundation to all other artistic mediums. Students will learn about drawing objects with correct proportions, adding value to drawings, and drawing from life/still images. Students will primarily work with graphite and charcoal to create pieces using a variety of subject matter

½ Credit

Prerequisite: none

Grades: 9-12

Advanced Drawing & Painting: This advanced course emphasizes greater use of media and techniques, personal expression and exhibition of work.

½ Credit

Prerequisite: successful completion of Drawing and Painting

Grades: 9-12

Digital Photography: Students will learn about the history of photography from film to digital photography today. They will learn how to use a DSLR camera. We will explore compositions of photos, lighting, color and how to modify images. We will use photoshop to edit and modify photos.

½ Credit

Prerequisite: none

Grades: 9-12

Advanced Digital Photography: Students will dig deeper into what we look at to make a good photo great. We will learn more about photo editing. We will explore different career options in photography. Students will end the class with a college/professional ready portfolio.

½ Credit

Prerequisite: Digital Photography

Grades: 9-12

Graphic Design: Students will be introduced to the applicable world of graphic design, developing ideas and sketches to create pieces that would be presented to prospective clients. We will explore a Photoshop-like program, practice manipulating images, discuss the importance of typeface in design, calligraphy, and experimenting with different layouts.

½ Credit

Prerequisite: none

Grades: 9-12

Independent Art Studio: An independent advanced class for the serious art student. Students will contract an individualized program to study their own area of art interest.

½ Credit

Prerequisite: Drawing, 1st Class in area of interest, consent of instructor

Grades: 11-12

Jewelry and Art Metals: Students will explore jewelry through the ages and learn a variety of different jewelry media including plastic, glass, ceramic, and metal. Techniques such as enameling, soldering, casting, and other art metal fabricating will be taught.

½ Credit

Prerequisite: none

Grades: 9-12

Painting: This class will emphasize developing personal expression and original ideas through painting media. Students will learn about different painting media such as watercolor, tempera, and acrylic. Students will get in depth with color theory, mixing their own colors and understanding how colors affect their piece. Students will also learn how to mat, frame and display work.

½ Credit

Prerequisite: none

Grades: 9-12

Printmaking: Class emphasis will be on developing personal expression and ideas through drawing and printmaking media. We will study a variety of printmaking techniques such as woodcut/linoleum cut, silkscreen, lithography, intaglio, calligraphy, and monoprints. We will focus on simpler techniques to understand the basic concepts of printmaking.

½ Credit

Prerequisite: none

Grades: 9-12

Sculpture: Students will study different sculpture styles and techniques in wood, metal, plaster, plastics, ceramics, and other materials in expressing personal and original ideas.

½ Credit

Prerequisite: none

Grades: 9-12

Business and Information Technology

Currently, all business and IT courses are offered through distance learning on the CWETN network.

Offered Every Year

Personal Finance

Please be sure to check the distance learning catalog for all options in this career area!

 [CESA 10 Distance Learning Catalog 2024-2025](#)

English

Offered Every Year

English 1
English 2
English 3
English 4

English 1: The focus of this course is on writing skills and the reading of various materials. Utilizing the writing process, students will compose a variety of written works, including: essays, nonfiction, creative writing, and a research paper. As students improve their writing skills, they will review and advance mechanics and usage skills. A major component of this class will also be discussion. Students will learn to discuss different literature and literary forms. Students will develop vocabulary skills and write essays in order to analyze characters, and compare and contrast works.

½ Credit

Prerequisite: none

Grades: 9

English 2: In this course, students will continue to develop and perfect their writing skills based on the skills they have already attained. Students will formulate individual writing goals based on a review of their writing portfolio. Emphasis will be on various forms of expository writing, including further development of the fundamentals of research. This class will study various forms of literature including novels, short stories, and drama. We will analyze form and content, as well as a number of literary devices through class discussion and individual writing.

1.0 Credit

Prerequisite: Successful completion of English 1

Grade: 10

American Literature: This course includes reading and discussion of representative American literature (poetry, short fiction, novels and drama) from colonial days to 1850. Vocabulary study and composition are incorporated into the study of literature.

½ Credit

Prerequisite: Successful completion of English 1 and 2

Grades 11-12

Foreign Language

Currently, all foreign language courses are offered through distance learning on the CWETN network.

 [CESA 10 Distance Learning Catalog 2024-2025](#)

Health

Health: This course is a comprehensive health class. The content areas include: Mental and Emotional health, Human Sexuality and Family Life; Alcohol, Tobacco and Other Drugs; Communicable and Noncommunicable Disease; Injury Prevention and Safety; Consumer Health; Environmental and Community Health. This course is required for graduation.

½ Credit

Prerequisite: none

Grades: 9-12

Health 2: This course will cover safety and First Aid. The content includes Lifeguard training, CPR/AED , Blood borne Pathogens, Inhaler, and Epi-pen training. This is an elective course and does not fulfill the high school graduation requirement. At its completion, students will be certified in Red Cross First Aid/CPR/AED and Lifeguarding for 2 years.

Course fee: \$40.00. Covers certification payment and CPR mask which is kept by the student.

½ Credit

Prerequisite: successful completion of Health

Grades: 9-12

Mathematics

Offered Every Year

Algebra Essentials (as needed)

Algebra 1

Algebra 2

Geometry

PreCalculus (as needed)

Tech Math

Algebra Essentials: This course presents foundations of high school level math. Students will strengthen their basic math skills including equations, functions, algebraic, and geometric concepts that will assist kids in being successful in Algebra. (instructor recommendation only)

1.0 credit

Prerequisite: none

Grade: 9

Algebra 1: This course revolves around the use of the language of mathematics as a problem-solving tool. Topics will include real numbers and number lines, solving of one and two variable equations, use of variables and algebraic equations to define and solve problems, and linear and quadratic relationships and functions. An emphasis will be placed on applications of algebra involving the solving of numerous real-life problems.

½ Credit

Prerequisite: none

Grades: 9-10

Algebra 2: This course is designed to follow Geometry and leads into pre-calculus concepts. It should be chosen by the student who is looking toward post high school education. The emphasis here is on functions. The course begins with patterns and a review of linear functions and continues with quadratics. Imaginary numbers will be introduced. Problem solving and applications of functions will be included.

1.0 Credit

Prerequisite: successful completion of Algebra 1 and Geometry

Grades: 11-12

Geometry: Geometry is the study of one, two and three-dimensional space. This course begins with a foundation of inductive thinking and mathematical proof. Topics of planar shapes, congruency, symmetry, and similarity are covered in depth. The properties of polygons (especially triangles) and circles are emphasized. Coordinate geometry is used to discuss perpendiculars, parallels, tangents, area, slope, distance, perimeters, and volumes.

1.0 Credit

Prerequisite: successful completion of Algebra 1

Grades: 10-11

PreCalculus: Pre-Calculus introduces the student to the meaning behind derivatives and integrals. Applications of functions for problem solving will include classic maximization problems. Trigonometric functions including polar coordinates and trigonometric identities and a thorough study of logarithms and exponential functions including natural logs are presented. Parametric equations, inverses and composite functions will be explored. Throughout the course, graphing calculators will be used to increase understanding and technological education.

1.0 Credit

Prerequisite: successful completion of Algebra 2

Grades: 11-12

TechMath: Technical Math is a math course designed for students looking for a rigorous review of foundational mathematical concepts. Technical Math is a preparation for students going into technical college mathematics and for those going directly into the workforce. Calculator use will be minimal during the first semester. Topics covered will be basic arithmetic operations with real numbers, measurement, ratios, percent, proportion, basic algebra, basic geometry, problem solving and right triangle trigonometry. This class will incorporate practical application of above mentioned topics.

1.0 Credit

Prerequisite: successful completion of Algebra 1 and Geometry

Grades: 11-12

Music

Band: This is a standard, 'traditional' band performance class that meets five times per week. A minimum of 50 minutes' practice time per week is expected. There are three to four major concerts per year, the possibility of four parades over the summer months is also possible and into the fall (Granton Fall Festival parade being one), pep band performances both away and at home, Veterans Day Program, large band WSMA festival performance, WSMA solo and ensemble participation and graduation ceremony. All performances are required and full participation is expected and graded.

1.0 Credit

Prerequisite: none

Grades: 9-12

Concert Choir: This is a performance class that meets five times per week. The choir performs at the music revue variety show concert, holiday concert, and large group music festival concert, and end of the year pops and awards concert. Music performed will be of concert and contemporary nature. Solo-Ensemble Festival is required for all students.

1.0 Credit

Prerequisite: none

Grades: 9-12

Physical Education

Lifetime Fitness: This class may include: Fitness plan/development/assessment, cooperative activities/team building, swimming skills, badminton, eclipse ball, dance, ultimate frisbee, volleyball-sand, fish-cast/bait/jig, orienteering/GPS, omniken ball, triathlon/ triathlon training, team-building, bocce ball, disc golf, snow shoe, Yoga, ice skating, fitness videos, rock climbing, dance, group dance, etc.

½ Credit

Prerequisite: none

Grades: 9-12

INDIVIDUAL/DUAL SPORTS: This class may include: Fitness plan/development/assessment, resistance training-tubes, race-walk/HRT monitor, swim-endurance swim skills, dance-country/square, bowling, cycling, golf, pickleball, self-defense, yoga, archery, tennis, downhill skiing, badminton, circuit/par fitness course, and triathlon/triathlon training, etc.

½ Credit

Prerequisite: none

Grades: 9-12

Weightlifting: This class may include: Creating weight training logs, charting weight records, learning weight maximums, yoga/ ball exercises, cooperative activities/team building, water fitness, frisbee skills, fitness videos, circuit fitness course, etc.

½ Credit

Prerequisite: none

Grades: 9-12

Team Sports: This class may include: Volleyball, basketball, floor hockey, Lacrosse, softball, swim-water polo, dance-social/folk, floor hockey, broomball, team handball, team-building, crazy cricket, table tennis, flag football, etc.

½ Credit

Prerequisite: none

Grades: 9-12

Women's Fitness: In Women's Fitness you will work on activities that focus on muscle toning and endurance training. This is a class that will work out your whole body without using a lot of weights. Activities will include step aerobics, yoga, pilates, and dance aerobics.

½ Credit

Prerequisite: none

Grades: 9-12

PHYSICAL EDUCATION CREDIT SUBSTITUTION POLICY

Students may complete an additional one-half credit in English, social studies, mathematics or science in lieu of one-half credit in physical education when they participate in a WIAA-sanctioned sport as part of the district's athletic program.

Courses eligible for substitution include any non-required course in English, social studies, mathematics or science. The one-half credit substitution must be beyond the minimum graduation requirements in these subject areas. The student must successfully complete this course during the same school year they participate in the WIAA-sanctioned sport. Students choosing to participate in the Physical Education Credit Substitution option must do so before 2nd semester of their senior year.

Additional requirements are as follows:

1. The student must participate in a WIAA sanctioned sport, beginning and ending the season in good standing.
2. The student must not be out for more than two weeks for injury or illness during the sport season, unless the injury or illness is validated by a medical professional.
3. The student must not have any athletic code violations resulting in a suspension of one or more competitions for the sport season.
4. The student must be an athlete eligible to compete throughout the duration of the season.

Students who choose to take a course as outlined above in lieu of one-half credit in physical education must register for the program with the School Counselor in advance and have the coach of the WIAA-sanctioned sport they participate in complete the Physical Education Credit Substitution Form after the season's end. The approved organized physical activity itself does not count as one-half credit of physical education. The one-half credit in one of the designated subject areas will replace the one-half credit of physical education requirement for graduation, leaving the student with a 1.0 credit high school physical education graduation requirement.

Science

Offered Every Year	Offered Every Other year
Biology Advanced Biology Chemistry Earth Science Astronomy Meteorology Vet Science Food Science Plant Science	<u>Even Numbered Years:</u> Anatomy & Physiology Physics <u>Odd Numbered Years:</u> Microbiology

Anatomy and physiology: Anatomy and physiology is a one-credit class focusing on the human body. Students will study the different systems of the human body and fundamental physiological concepts. Any student thinking about careers in health or medical related careers should take this course as an introduction to that field. Students will be required to read two novels throughout the semester for reading integration. During the school year, the topics of ethics and morals will be addressed and the dissection of chicken eggs and cats will take place. Students will need to be open to these concepts in order to enroll in this class.

1.0 Credit Prerequisite: successful completion of biology (B or better or consent of instructor) Grades: 11-12

Astronomy: This semester course will provide a general survey of Astronomy. Topics will include the history of astronomy, time, tools of astronomy, the solar system, stars and stellar evolution, galaxies, dark matter and dark energy, cosmology and space exploration. The course will include several moodle and internet based projects throughout the semester. Students will have the opportunity to visit a planetarium for a class field trip. For those wondering what is beyond their front door or in this case Earth. It is advised that students have computer access at home for homework completion.

½ Credit Prerequisite: none Grades: 10-12

Biology: Biology is the study of life and living organisms. This course encompasses four main themes, the process of diversity, energy flow through an ecosystem/individual species, information necessary for life processes, and biological

interactions. This class includes learning about the scientific method experiments and other tools biologists use to test their discoveries, cell biology, evolution, genetics and ecology.

1.0 Credit

Prerequisite: none

Grades: 9-10

Advanced Biology: Advanced Biology is the study of animals and their behaviors and interactions within their environment. This course will build the student's critical thinking skills while focusing on animal classification, species adaptation and diversification, and comparative anatomy through the dissections of various species of animals.

1.0 Credit

Prerequisite: none

Grades: 10-12

Chemistry: Chemistry is the study matter, including its properties as well as its components. This class is a must for anyone with plans of post high school education. Topics include Scientific Measurement, SI, Classification of Matter, History of the Atom, Atomic Structure, Electron Clouds, the Periodic Table, Chemical Formulas, Moles, Chemical Reactions, Chemical Bonding and Gas Laws. There is a strong lab component to this course.

1.0 Credit

Prerequisite: Algebra 1 (grade of C or better or consent of instructor)

Grades: 10-12

Earth Science: This course is designed for students with an active interest in the physical world around them. Topics will be covered in depth, and will include rocks and minerals, weathering and erosion, maps, plate techtonics, water on the Earth, air cycles, weather, climate, and our place in space. This course will be much more rigorous than middle school Earth Science, with much more attention to detail and the scientific method.

½ Credit

Prerequisite: none

Grades: 10-12

Microbiology: This course may be of interest to students planning to enter health related fields after graduation. Units include: basic microscope techniques, microbiological specimen preparation and staining techniques, morphology, nutritional and environmental needs of microbes, genetics and microbe identification. Students will be learning and using laboratory techniques that will help prepare them for secondary education. Students will be required to read two narratives throughout the semester for reading integration.

1.0 Credit

Prerequisite: successful completion of Biology (B or better or consent of instructor)

Grades: 11-12

Physics: Physics is the study of matter and energy and how they are related. Topics include Measurement, SI, Classical Mechanics, Force, Gravitation, Friction, Momentum, Light/Optics, and Sound. There is a strong lab component to this course.

1.0 Credit

Prerequisite: successful completion of Physical Science, Algebra 1, and Geometry (Grade of C or better in each, or consent of instructor)

Grades: 11-12

Food Science: This course combines agriculture and consumer education to develop an appreciation and understanding of the American Food Supply. Careers, nutritional requirements and food labeling will be featured. Steps and application in Food Processing and engineering will be demonstrated through various lab processes, as well as basic food microbiology labs. Food Safety, Biotechnology and new trends in food chemistry will also be a key emphasis of the course. This course proves to offer many hands-on exercises in studying food for its nutrient value and safe handling.

½ Credit

Prerequisite: successful completion of Biology

Grades: 10-12

Plant Science: This class will focus on the biology of flowers. Topics covered in the class will include the cell, plant anatomy, plant functions, and propagation of plants, flowers, trees and shrubs. This class will also utilize the greenhouse to conduct a plant sale. Students will be responsible for all planting, care, marketing, and selling of plants.

½ Credit

Prerequisite: successful completion of biology

Grades: 10-12

Vet Science: This course includes units on biotechnology, genetics, animal reproduction and physiology, veterinary science and animal health, and animal nutrition. Controversial and accepted technologies in agriculture are also studied. Students can train and receive certification in AI.

½ Credit

Prerequisite: small animal care or large animal production or biology

Grades: 11-12

Social Studies

Offered Every Year	Offered Every Other year
American History 1 American History 2 Political Science World History 1 World History 2 Psychology World War 2 Current Events	<u>Odd Numbered Years:</u> Wisconsin Social Studies

American History 1: This required course, designed for incoming freshmen and some sophomores, will give students an introduction to the geography, people, places, events, attitudes, and ideas that have helped shape America. American History I starts with America before European contact, follows the creation and development of the American colonies and the fledgling American nation, before focusing on the struggles of the young country. Special emphasis at that point will be put on the division created over the issue of slavery, the resulting Civil War, and finish the year with post-war Reconstruction.

1.0 Credit

Prerequisite: none

Grade: 9

American History 2: This required course picks up where American History I left off. We will look at the foundation of modern America from the 1860's until World War I including the settling of the West and the issues associated with race, industry, cities, and immigration. The course will then switch into turn of the century foreign policy forays, the Roaring 20's, the Great Depression, and World War II. The end of the year will be spent on the social, economic, political, and cultural developments since World War II that have shaped our country today with emphasis on the Cold War, Civil Rights movement, Vietnam era, and issues that our country faces today.

1.0 Credit

Prerequisite: none

Grade: 10-11

Wisconsin Social Studies: During the course of this class we will be learning about Wisconsin from the perspective of a number of different Social Studies disciplines. We will learn the geography and climate and the regional differences of those in our state. We will spend the majority of the class learning about the history of our state; starting with Native Americans through the early European settlement leading to statehood, the Civil War, the many changes in our economy, and the struggles of modern times. During the course of that study we will learn some of the origins and features of our state's unique culture and people. We will then turn to a sociological and demographic look at Wisconsin today. We will look at the people of the state and features like religion, ethnic groups, race, income, and regional differences. We will finish the year with a brief overview of our government system in Wisconsin. This course meets 0.5 credit of the social studies elective requirement.

½ Credit

Prerequisite: Completion of American History 1 & 2

Grades: 11-12

Current Events: This course will focus on events that have happened around the World in the past 20 years. We will investigate the historic origins of the events that make world new headlines today. Students will be required to read and analyze current news publications in periodicals such as Newsweek and Time. Much of the class will be discussion and research based. Students will be able to choose many of the topics discussed in class.

½ Credit

Prerequisite: Completion of American History 1 & 2

Grades: 11-12

World History 1: Students learn about the rise of civilizations in the Near East, the Egyptians in the days of the Pharaohs, and the warring City-States of Mesopotamia. The culture and society of the Ancient Greeks will be examined, from the militaristic polis of Sparta to the world's first democracy in Athens. Special attention will be paid to how the philosophy of ancient Greece has shaped western culture. The rise and fall of the Roman Republic and Empire will be analyzed, from its beginning as a small city to the most powerful Empire the world had ever known. Special attention will be paid to individuals of high influence and examining the impact of the individual on the course of history. Finally, we will examine the rise of Christianity and the barbaric kingdoms of Europe following the collapse of Rome. World History I and II may be taken in any order.

½ Credit

Prerequisite: Completion of American History 1 & 2

Grades: 11-12

World History II: Students will learn about the Middle Ages through our current times. As the Renaissance brings new light to Europe in the areas of science, mathematics, art, literature, and music, Europe also begins to dominate the globe politically. We will examine how this European dominance began as well as how it has impacted the world we inherit today. Time periods of focus will include the Renaissance, revolutionary Europe in the 1800's, and the dynamic 20th century. Special attention will be paid to the concepts of revolution, art, philosophy, technology, warfare and current events. Students will be expected to think critically about readings and writing and question conventional understandings of what history is and how it affects the world today. World History I and II may be taken in any order.

½ Credit

Prerequisite: Completion of American History 1 & 2

Grades: 11-12

Psychology: The curriculum provides a high school level overview of basic psychological concepts such as brain development, function, personality, altered states of consciousness, and abnormal behaviors. Students are expected to design, execute, present, and experiment. Writing skills are emphasized in this course.

½ Credit

Prerequisite: Completion of American History 1 & 2

Grades: 11-12

Technical Education

Offered Every Year	Offered Every Other year
Woods 1 Woods 2 Intro to Welding Advanced Welding Metals AutoCad 1 AutoCad2 Building and Construction Manufacturing Advanced Tech Ed Home & Auto Maintenance	<u>Even Numbered Years:</u> Small Engines <u>Odd Numbered Years:</u> Power, Energy & Transportation Architectural Drafting

Woods 1: This is a semester course in which students will learn how industry alters materials to fit consumer's needs. The class will cover safety, measurement, calculating board feet, work instructions, precision measurement and reading blueprints. Students will learn about different processes which include: combining, separating, forming, and finishing. Students will have the opportunity to work with and transform wood into a variety of products throughout the semester. Safe and correct operation of all lab tools and equipment is required.

½ Credit

Prerequisite: none

Grades: 9-12

Woods 2: his class will expand on previously learned skills covered in Woods I. In this class students will cover many of the same topics in greater depth and accuracy. Students will also design, purchase materials and build their own woodworking projects. The \$15 will cover the first project of the class but projects after that will need to be paid for by the student.

½ Credit

Prerequisite: Woods I or consent of instructor

Grades: 9-12

Building and Construction: This is a one-semester course for those students with a strong interest in construction related careers. Emphasis is placed on residential construction and students will learn about the many tools, techniques, and materials used in the residential construction industry. Safety and construction code is also outlined along with the many career opportunities in the construction technology area. The course often centers around one large building project and students should be prepared for some physical labor.

½ Credit

Prerequisite: Woods I or consent of instructor

Grades: 9-12

Metals: This class is recommended for 9th and 10th graders. Students learn about safety, materials, and processes used in industry. They study types of metal, tools, and methods of machining: lathe milling machines, drill presses, and sheet metal work.

½ Credit

Prerequisite: none

Grades: 9-12

Manufacturing: This course is designed for students to learn about the broad field of manufacturing. Students will learn about what manufacturing is, how it has developed, different types of manufacturing, planning, and production. Students

will work as a group to form a small company in which they will design, produce, market, package, and distribute their product.

½ Credit

Prerequisite: Woods I or consent of instructor

Grades: 9-12

Intro to Welding: (TC, Mid-State Technical College: Stainless Steel Welding Certificate Program - 1 credit) This course will teach students a variety of skills needed to work in the manufacturing industry. The class will cover safety, measurement, blueprint reading, forging, sheet metal, metal Layout, MIG welding, TIG welding, Arc welding, oxy-acetylene, and career opportunities. The students will receive lectures, demonstrations and lab time to produce several projects.

½ Credit

Prerequisite: none

Grades: 10-12

Advanced Welding: Advanced Welding is a metal fabrication and construction course. Students will receive experience in arc and oxyacetylene welding. Accelerated students also receive experience on the TIG and MIG machines. The course will include a student-designed project.

½ Credit

Prerequisite: Intro to Welding

Grades: 10-12

Intro to Auto Cad: In this course, students study the fundamentals and basic constructions used in drafting. Fundamentals such as line weight, lettering, and dimensioning are studied. This course is designed for students seeking in-depth, hands-on knowledge of technology. Students will be working to design, construct, and test various projects throughout the year, utilizing a 3D solid modeling program. These projects may include: Puzzle Cubes, Desktop Organizers, and Lego Products. This course could lead into the vast fields of engineering: medical, environmental, manufacturing research & design, and/or computer applications. All drawings will be completed using Computer Aided Design (CAD) software. Students are encouraged to take advantage of the year-long option for this course, but may take for one semester if schedule conflicts will not permit a full year.

½ Credit

Prerequisite: none

Grades: 9-12

Applied Home and Auto Maintenance: This course is designed for those students with an interest in general consumer awareness pertaining to home and automobile maintenance. The class will be split by quarter, one quarter will be dedicated to Autos and another to Home maintenance. In the Autos portion of the class students will be focused on purchasing, maintaining, and repairing vehicles. The Home portion of the class will focus on residential wiring and home wiring design. Students will gain hands-on experience in auto maintenance, basic electrical wiring, and plumbing.

½ Credit

Prerequisite: none

Grades: 9-12

Small Engines Technology and Repair: Students will learn how to diagnose, tune-up, repair and rebuild all types of small air cooled engines. They will study the two and four stroke cycle engine and an introduction to the automobile engine.

½ Credit

Prerequisite: none

Grades: 9-12

Power, Energy, & Transportation: This course is divided into five segments: sources of energy, transmission of energy, storage and control of energy, and transportation. Students rotate through learning stations that include basic electronics, hydraulics, engines, mechanisms and solar energy.

½ Credit

Prerequisite: none

Grades: 10-12

Architectural Drafting: This course focuses on architectural drafting. Drawings will be completed with AutoCAD. There will be an expansion upon the first semester's work to include architectural details, 3-D drawings, utility plans (plumbing, electrical, and HVAC), schedules, sections, landscape plans and pictorials. The course work will emphasize good architectural design, fundamentals, and engineering principals as well as career study in the field of Architectural Drafting. Students should be self-motivated.

½ Credit

Prerequisite: Autocad recommended

Grades: 9-12

Advanced Tech Ed: In this course, students work independently under learning contracts on research projects or lab projects of their own design and fabrication. *All material cost (such as wood and metal) for projects must be paid by student.* Some career study will be included as part of this course. Students may work in any area of Technology Education as long as they have completed the prerequisite courses in that cluster. Students will need to submit a project plan along with parent approval before they are allowed to enroll in the class.

½ Credit

Prerequisite: consent of instructor

Grades: 9-12

Agriculture, Food, & Natural Resources

This diverse Career Cluster prepares learners for careers in the planning, implementation, production, management, processing, and/or marketing of agricultural commodities and services, including food, fiber, wood products, natural resources, horticulture, and other plant and animal products. It also includes related professional, technical and educational

services.

The Seven Pathways
